

ISO Toolkit™

Introduction:

This is the only toolkit your organization needs for total compliance. Written by industry experts, all documents are created using Microsoft tools and are fully editable. They have been tailored to the fire and security industry based on our extensive work in the industry since 1993. ISO certification is guaranteed when combined with our full compliance service.

Your initial purchase includes 12-months subscription to our update and enhancement service. All documents will be kept up to date as standards and regulations change. New documents will be added as new ISO standards are accounted for; ISO27701 Privacy Management will be added later in 2022 for example.

What does our ISO Toolkit™ contain?

Everything an organization in the fire and security needs to comply with industry standards (NSI/BAFE) and:

- ISO9001 Quality Management
- ISO14001 Environmental Management
- ISO22301 Business Continuity Management
- ISO27001 Information Security Management
- ISO45001 Health and Safety Management
- GDPR
- HR Management
- BS7858.

Why is it good for your organization?

The extensive suite of policies, procedures, toolbox talks, registers, forms and training material, plus a staff company handbook and contract of employment. All of which will help your organization to:

- Manage risk
- Plan audits
- Control corrective actions
- Manage staff and subcontractors
- Map data and personal information
- Maintain compliance to all standard and regulations
- Manage external parties and providers
- Conduct a SWOT analysis
- Manage 3rd party certification, i.e CHAS, Constructionline, SMAS, Safecontractor.

Your subscription includes:

- Full unlimited access to the ISO Toolkit™
- Unlimited downloads
- Email support
- Option to purchase our remote auditing services at 35% discount off our standard rate
- New policies added on request
- One time purchase with no hidden charges
- The documentation is ready to download and is yours to keep forever.
